

## Make a mobile

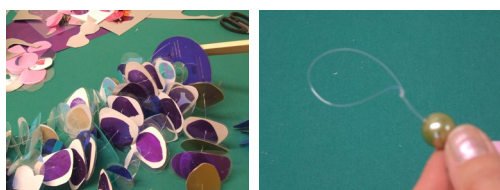

*N.B. It is not safe to hang mobiles where young children can reach them.*

1. Cut shapes out of your stiff materials. Aim for at least 10 pieces for each strand. Use a drawing pin to make a hole in each piece. It doesn't have to be in the middle

2. Tie a knot around a bead at the bottom of a piece of cotton or fishing wire and then thread on the first piece. Use another knot higher up or some beads to make a space. Thread on the next piece

3. Make more than one strand and join them together on a stiff piece of plastic, e.g. an old CD with holes drilled in it or use lolly sticks. Tie a hanging loop.

## Materials and equipment

- Scissors
- Plastic milk bottles, card, plastic table mats, laminated paper or any stiff material that you can cut with scissors
- Strong cotton, fishing wire or wool cut into lengths
- Beads – either from an unwanted necklace or use Hama beads
- Lolly sticks, drilled CDs or similar things to attach the strands to

## Other ideas & tips:

- Use colours that match your room
- Find lots of different colour plastic bottles to cut up
- Try laminating sweet wrappers or old wrapping paper
- Hang the mobile near a window or radiator where the air will make it move
